

**CLAIM(S):**

The embodiments of the invention for which an exclusive property or privilege is claimed, are defined as follows:

-- 2. (Amended) A filter for purifying air and keeping cleanly the ducts of a hot air system or central air exchanger, which [fits with any] takes automatically the shape of the inlet from a duct when it is installed, and which is held in place by a spring means. --.

**CLAIM(S):**

The embodiments of the invention for which an exclusive property or privilege is claimed, are defined as follows:

2. A filter for purifying air and keeping cleanly the ducts of a hot air system or central air exchanger, which takes automatically the shape of the inlet from a duct when it is installed, and which is held in place by a spring means.

automatically the square shape of the inlet from the duct, and which is held in place by a spring means.

Figure 4 is an exploded view thereof.

Figure 5 is a perspective view of same filter that [fits with] takes automatically the rectangular shape of the inlet from the duct, and which is held in place by a spring means.

Figure 6 is an exploded view thereof.

#### **DETAILED DESCRIPTION OF THE INVENTION:**

Referring to the figures 1 to 6, it may be seen that the filter (1) of the present invention is used for purifying air and keeping cleanly the ducts of a hot air system or central air exchanger, which [fits with any] takes automatically the shape of the inlet from a duct when it is installed, and wichh is held in place by a spring means (2)(3).
